ARJUN CHAUDHARY

Software Developer

📞 9106614742 @arjun910661@gamil.com 📍 Surat

SUMMARY

Software Developer with 3 years of experience in JavaScript, TypeScript, React.js, React Native, Node.js, Nest.js, and Next.js. Expert in building scalable web and mobile applications, delivering high-quality solutions in agile environments.

SKILLS

JavaScript	Typescript	React	React Native	Next Js
Node js	Nest Js			
Redux	React Query	RTK Query		
Prisma	GraphQL	MongoDB	PostgresSQL	MySQL
Tailwind	Bootstrap	MUI	Antd Design	
AWS	Firebase			
Git	Github	Jira	Trello	Slack

EDUCATION

Master of Computer Applications (MCA)

Veer Narmad South Gujarat University Surat

📅 06/2022

Bachelor of Computer Applications (BCA)

UCCC & SPBCBA & SDHGCBCA & IT College,

📅 02/2020

EXPERIENCE

Senior Software Developer

La Net Team Software Solution Pvt Ltd

📅 08/2022 - Present 📍 Surat

- Spearheaded the architecture and implementation of complex frontend solutions using React.js, leveraging advanced state management and reusable component patterns to enhance scalability and maintainability.
- Designed and implemented scalable backend solutions with Node.js and NestJS, integrating GraphQL for efficient data querying.

Software Developer Intern

La Net Team Software Solution Pvt Ltd

📅 02/2022 - 07/2022 📍 Surat

- Implemented and maintained state management with Redux, improving application stability and facilitating seamless data flow between components.
- Collaborated with senior developers to design and execute GraphQL queries and mutations, enhancing data fetching and manipulation efficiency.

React Native Developer

Advait Infotech Surat

📅 01/2021 - 12/2022 📍 Surat

- Built RESTful API services using Node.js that integrate with the React Native application.
- Integrated push notifications into mobile app using Firebase Cloud Messaging or OneSignal SDKs

PROJECTS

Tri Star Sports and Entertainment CRM

Developed a comprehensive business management system for Tri Star Sports and Entertainment. The project utilized React.js, Nest.js, GraphQL, and PostgreSQL for the web application, and React Native with Firebase for the mobile app.

The system enabled efficient management of client information, scheduling, and communication, enhancing operational efficiency and client satisfaction.

Insurance Management (HeroLife Insurance)

Developed an insurance management system for HeroLife Insurance using React, Nest.js, and MySQL. This project streamlined various insurance processes and improved overall efficiency.

The system provided functionalities for policy management, claims processing, customer support, and reporting, significantly enhancing operational workflows and customer experience.

Transport Management (Transport Guru)

Developed a Transport Management System for Transport Guru using React Native, Firebase, and MongoDB. This project aimed to optimize transport operations and enhance user experience.

The system enabled efficient tracking and management of transport fleets, real-time location updates, route optimization, and driver management, significantly improving operational efficiency and customer satisfaction.
